DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

One side wall and perhaps more remnants of an earlier building have been incorporated into this flat roofed free standing structure. The walls are of common bond brick, some old, some recent.

There is a shallow applied mansard just under the sills of the 2nd floor windows. Not quite centered and immediately below the mansard is a large garage door. There is a door in both sections of wall flanking the garage door. Each door is solid and flush, though the one to the right has a louver in its lower third.

The four windows are evenly spaced. A brick band course forms their sills. The 2nd window from the right has been boarded up to install an air-conditioner and a louvered vent. The other windows each have 5 horizontal panes of glass. The two side walls are slight by taller than the roof level and are capped with concrete.
